DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-18, drawn to a target for measuring the relative positions between two layers, classified in class 430, subclass 22.
- II. Claims 19-20, drawn to a method for providing a database, classified in class 702, subclass 150.
- III. Claims 21-41, 44-52, and 55-87, drawn to a system for determining misalignment, classified in class 356, subclass 401.
- IV. Claims 42-44 and 53-54, drawn to a system for determining misalignment using interference, classified in class 356, subclass 508.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and III and I and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, the inventions of groups III and IV have separate utility such as alignment of a mask and wafer. See MPEP § 806.05(d).

The Invention of Group II is unrelated to the inventions of Groups I, III, and IV. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different function and different effects.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for the individual groups is different, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
